

Création d'objets pour X-Plane V11

Installation du plugin XPlane2Blender

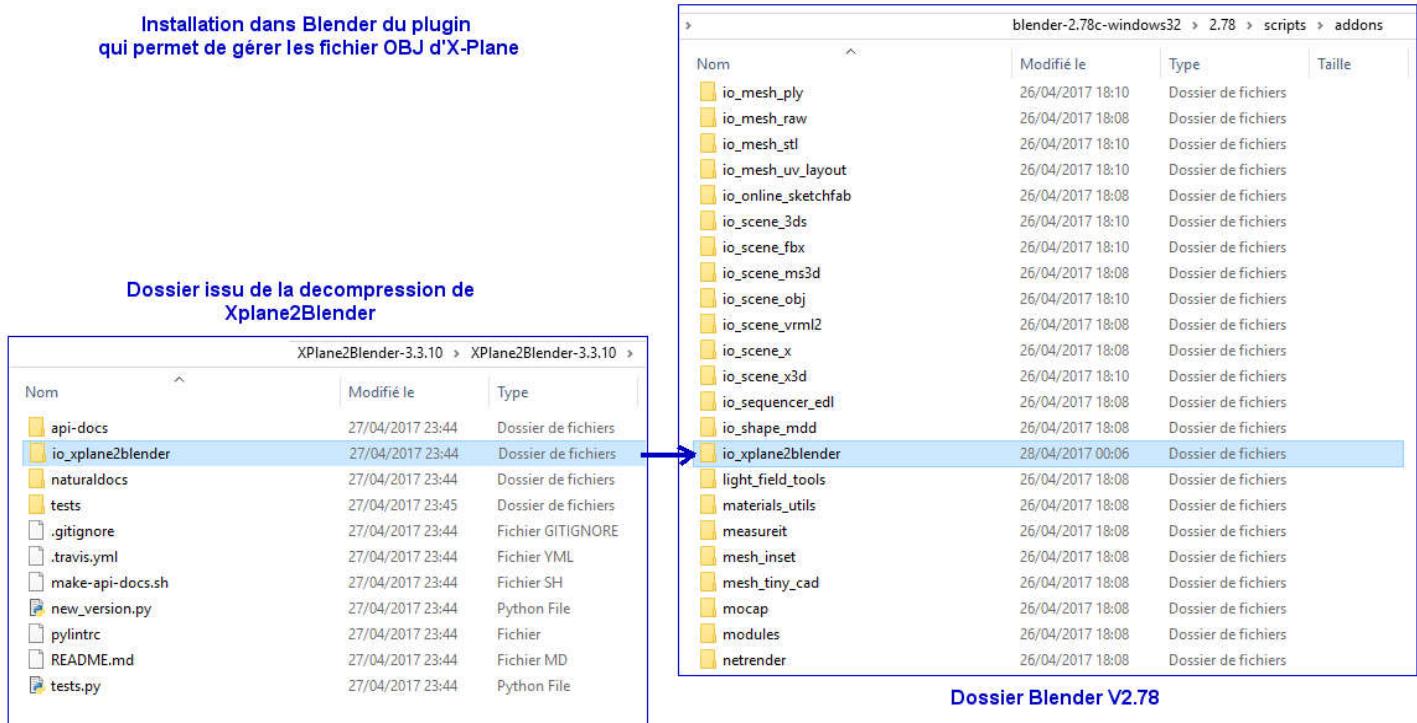

1- Télécharger et installer Blender 2.78

<https://www.blender.org/download/>

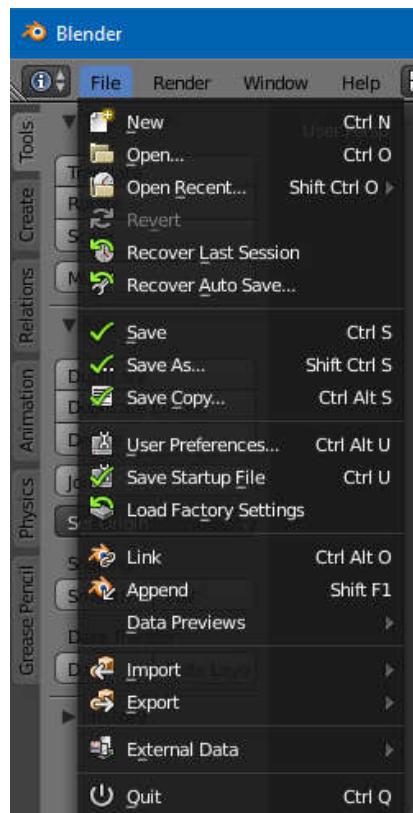

2- Télécharger et déziper XPlane2Blender

<https://github.com/der-On/XPlane2Blender/archive/v3.3.10.zip>

3- Copier le dossier io-xplane2blender dansle dossier des addons de Blender comme indiqué dans l'image ci-dessous :

4- Valider l'utilisation du plugin dans les User-Preferences de Blender :

5- En cochant l'option « import-export : import/export :Xplane

The screenshot shows the Blender User Preferences window under the 'Import-Export' tab. The left sidebar lists categories: Supported Level (Official, Community, Testing), Categories (All, User, Enabled, Disabled, 3D View, Add Curve, Add Mesh, Animation, Development, Game Engine, Import-Export, Material, Mesh, Node, Object, Paint, Pie Menu, Render, Rigging, System, UV). The 'Import-Export' category is selected and highlighted in blue.

The main area displays various import-export options:

- Import-Export: 3D-Coat Applink
- Import-Export: Acclaim Motion Capture Files (.ast, .amc)
- Import-Export: Atomic Blender - PDB
- Import-Export: Autodesk 3DS format
